by Ken Ham

In *Creation to Babel*, Ken Ham explores the biblical account of the six days of creation and the Tower of Babel, providing a detailed analysis of the text and its implications for our understanding of the world around us.

Ham argues that the Bible's account of creation is not a myth or a fable, but a true and accurate account of how God created the world. He provides

evidence from the text itself, as well as from the natural world, to support his claims.

Ham also discusses the implications of the biblical account of creation for our understanding of human origins and the history of the world. He argues that the Bible's account is consistent with the scientific evidence and that it provides a more comprehensive and satisfying explanation for the origin of the universe than do evolutionary theories.

Creation to Babel is a must-read for anyone who is interested in the biblical account of creation and its implications for our understanding of the world around us.
