This book is a comprehensive exploration of the relationship between knowledge, choice, will, desire, the moral ideal, economics, and economic value. It draws on a wide range of disciplines, including philosophy, psychology, economics, and history, to provide a deep and nuanced understanding of how these concepts interact.

The book begins by examining the nature of knowledge and how it is acquired. It then explores the role of choice in human action, and how our choices are shaped by our desires and our understanding of the moral ideal. The book also examines the relationship between economics and ethics, and how economic value is determined by our choices and desires.

This book is a valuable resource for anyone interested in the relationship between knowledge, choice, will, desire, the moral ideal, economics, and economic value. It is a must-read for scholars in these fields, as well as for anyone who wants to understand the complex interplay between these concepts.
