Scientific papers are written reports of original research. They are typically published in peer-reviewed journals, which means that they have been reviewed by other experts in the field before they are published. Scientific papers are the primary way that scientists share their findings with the broader scientific community.

Scientific presentations are oral presentations of research findings. They are typically given at conferences, symposia, and other scientific meetings. Scientific presentations are a great way to share your research with a wider

audience, including scientists from other disciplines, policymakers, and the general public.

Whether you are writing a scientific paper or giving a scientific presentation, it is important to be able to communicate your findings clearly and effectively. This book will provide you with the tools you need to do just that.

Part 1: Writing Scientific Papers

The first part of this book covers the basics of writing scientific papers. We will discuss the different sections of a scientific paper, the style and formatting requirements, and the process of submitting a paper to a journal.
